***Restriction***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 43-55, drawn to an inline skate wheel, classified in class 301, subclass 5.307.
  - II. Claims 15-19, and 41, drawn to a method of molding an inline skate wheel, classified in class 264, subclass 271.1+.

It should be noted that claim 42 depends from cancelled claim 1 and therefore could not be included with the restriction requirement at this time.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the skate wheel as claimed could be formed on the hub by injection molding.

Art Unit: 3617

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

***Election of Species***

4. Claims 43-55 are generic to a plurality of disclosed patentably distinct species comprising:

A first embodiment of the wheel as shown in figures 1-5.

A second embodiment of the wheel as shown in figures 8-11.

A third embodiment of the wheel as shown in figures 12-15.

A fourth embodiment of the invention as shown in figures 16-19.

Should Applicant elect claims 43-55, then Applicant is further required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

Art Unit: 3617

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(l).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Russell D. Stormer whose telephone number is (703) 308-3768. The examiner can normally be reached on Monday through Friday, 9 AM to 4 PM.
